OUTDOORS

OVER A HALF CENTURY OF CROSSBOW EXCELLENCE

Barnett has pioneered the crossbow industry for over 50 yrs. With a devotion to quality and a commitment to excellence, the team at Barnett continues to drive innovation all while producing top performance at an affordable price. Where else can you find speeds like what's ingrained in our products at the retails we are able to maintain? Just take a look at the dollars per foot per second. The math doesn't lie.

Barnett sets the bar for innovation for the entire industry and has since the late 1950's. From the invention of the first shoot thru foot stirrup, to the rope cocking devices you see every day, Barnett has set the trend and mold for every crossbow available today.

We are Made in the USA and proud of it. Our team in Tarpon Springs, Florida is second to none, and works year round to maintain inventory all while focusing more and more on the quality, and innovation of the product. Our dedication and investment in a domestic facility is what makes this all possible. We are the only crossbow company who truly manufactures the product from start to finish. From molding the stocks, to machining cam's, to dipping the camo, to the trigger assembly, Barnett will continue to lead with American ingenuity.

TECHNOLOGY INNOVATIVE ENGINEERING

CARBONLITE™

The Carbon Riser Technology (CRT®) is another first for the Crossbow industry, and once again is brought to you by Barnett. This proprietary technology has been cast into Barnett's patented Shoot Thru Foot Riser. Boasting a 5 to 1 safety factor, this ultralight, super strong Riser affords the best balance available.

The Shoot Thru Riser, patented by Barnett, revolutionized the crossbow industry. This unique and sought after design lengthened the power stroke of a bow without placing the cocking string beyond arms length. This allows for increased speeds and stored energy levels unequalled in the industry. FEA (Finite Element Analysis) testing enabled the design team to minimize the weight and maximize the strength, (a process used by NASA and now in Barnett Crossbows) making the Predator®, among other Barnett models truly a step above the rest.

ICON LEGEND

CarbonLite – New CRT Carbon Riser. The most technically advanced riser ever created for a crossbow. It removes nearly 43% of weight from the front end which dramatically shifts the balance point to the shoulder. This allows for the steadiest, and most accurate shot possible.

Shoot Thru Riser – Patented by Barnett this unique and sought after design lengthened the power stroke of a bow without placing the cocking string beyond arms length. This allows for increased speeds and stored energy levels unequalled in the industry. FEA (Finite Element Analysis) testing enabled the design team to minimize the weight and maximize the strength, (a process used by NASA and now in Barnett Crossbows) making this technology truly a step above the rest.

ADF (Anti Dry Fire) – This ADF Trigger is a state of the art mechanism that protects the user from shooting the weapon without an arrow in place. The patented Anti Dry Fire Trigger has a spring loaded redundant safety bar that remains in place until the arrow is seated properly, which finally allows the user to switch the safety off and shoot the bow.

MIM (Metal Injected Mold) – This trigger is metal injected molded which allows for the tightest quality tolerances available. This accounts for the refreshingly smooth trigger pull at 3.5 pounds. Less jerking and ultimately tighter groups.

AVI (Anti Vibration Isolation) - Patented high compression over molded limbs and/or components. This reduces noise and vibration by up to 30%. AVI also helps prevent inadvertent nicks and scratches, and provides a protective barrier.

Integrated Crank Available – Remove the Cheek piece and install your new CCD (Crank Cocking Device). Integrated bushings in the stock provide for fast and effective install of the crank device.

Speed Dial – Designates the speed (feet per second) for that particular piece of equipment. Patented trigger assemblies affords the maximum power stroke available and ultimately providing the fastest equipment for the money spent.

Illuminated Scope – This product comes complete with an Illuminate Recital Scope as part of the base package. Helps in low light conditions to see the cross hairs.

Easton Arrows – Every crossbow in this catalog that carries this icon ships with quality Easton custom carbon arrows, engineered to provide maximum performance with the product it ships with.

CROSSWIRE®

PREMIUM CUSTOM CROSSBOW STRINGS

This proprietary manufacturing process blends our fibers with the industry's toughest serving materials. Combining these qualities and attributes guarantees that the shooter has the most stable and reliable string in the industry!

The ADF (Anti-Dry Fire) trigger system from Barnett. This MIM (Metal Injection molding) trigger contains the added safety precaution of the ADF "Anti Dry Fire" feature, eliminating unintentional dry firing of your bow. MIM components allow for a smooth 3.5 lb pull.

AVI: The "Anti Vibration Isolation" system utilizes a unique material designed specifically for use on Barnett Crossbows. AVI material completely encapsulates the limb dramatically reducing vibration. This process not only decreases noise levels by nearly 30% but also protects the limbs from normal wear and unintentional contact with hunter's natural surroundings and increases the life of the limbs along with reduced cable and string wear.

Noise or lack of it is key to a successful hunt. Vibration produced when firing the crossbow resonates through the foot stirrup as the arrow is launched from any bow. Barnett engineers recognize this and have extended the AVI technology to include the foot stirrups on all of their full-size crossbows.

Barnett was the first to offer a Crank Cocking Device to the industry and through advancement in technology and design innovations this Barnett crank is designed to be fully integrated into the stock of the bow. It provides a low profile; comfortable fit and the handle easily adjusts to right or left hand. Barnett cranks reduce cocking tension to a mere 16lbs.

Introducing The Ghost400 CarbonLite, the flagship of the Barnett line

- The most technically advanced crossbow to hit the market.
- It is a perfect blend of performance and comfort and leaves nothing for wanting when you look at the entire package.
- Shooting lightning speeds of 400+ fps it leads the industry with raw power.
- Equipped with our proprietary NEW Carbon Riser Technology (CRT), making this bow the lightest and strongest in its class.
- The all aluminum extruded flight track affords it one of the smoothest shots available. Also standard on the Ghost400 is Barnett's ADF trigger (anti dry fire) assuring the safest experience available and the CROSSWIRE® string and cable system.
- Comes with three 22" arrows, Barnett's NEW Talon crossbow sling, NEW Carbon Cross® 3 arrow quiver, rope cocking device, and premium paper-sighted illuminated scope.

Package-Carbon Cross 3 Arrow Quiver, 3-22in. Arrows, Barnett Talon Crossbow Sling, Rope Cocking Device & Premium Paper Sighted Illuminated 3x32 Scope #78022

The Ghost350 CarbonLite

- The Ghost350 CarbonLite is one of the lightest bows to ever come out of the Barnett factory.
- At just over 7.6 lbs you'll be able to shoulder and hold better accuracy with little effort.
- The Carbon Riser Technology (CRT) removes enough weight out of the front end to move the center of gravity back to the end of the stock, making it much easier to carry.
- This bow ships with CROSSWIRE® string and cable system and shoots 350 fps, providing more than enough power for any occasion.
- The package will be complete with quiver and three 22" arrows, premium illuminated reticle scope and rope cocking device.

ACCESSORIES

Quad Crank Cocking Device

Designed to be fully integrated into the stock of the bow for a low profile, comfortable fit. The handle easily adjusts to right or left hand and with the turn of a thumbscrew, may be removed after each usage. Reduces cocking tension to 16lbs.

17031 Ghost 400 & 350/Buck Commander/Penetrator/Quad 400/Wildcat C5 Crank Cocking Device

Predator Crank Cocking Device

Reduces cocking tension to a mere 16lbs. This device will also slide on and off of the dovetail, streamlining equipment, and allowing for a more comfortable fit. The handle is quickly installed either for Right hand or Left hand use. The crank cocking device insures the shooter a more consistent pull providing a guaranteed placement every time.

17057 Predator/Revolution Crank Cocking Device

Cross® Illuminated Scope

Low light, time for a battery change? Don't be left in the stand wondering. This 3x32 Illuminated Reticle Scope is not only a red or green 3 dot sight, but also has multiple reticles for dependable placement when you need it most.

17045 Cross® Illuminated 3X32 Scope

Premium Red Dot Scope

With technology as it is today, this varying dot intensity Premium Red Dot Sight is the perfect choice for any bow and simplifies your shooting experience. Red Dots allow you to keep both eyes open while shooting. Just in case that 'bigger buck' steps into the picture.

17054 Premium Red Dot Sight

4X32 Multi-Reticle Scope

This 4x32mm Multi-Reticle Scope is water proof, shock resistant and allows for shooting at various yardages quickly and easily.

17060 4x32 mm Multi-Reticle Crossbow Scope with Rings

Lubewax

Barnett's Lubewax protects and extends the life of your crossbow's strings. Use after every 5 shots.

16061 Barnett Lubewax (3 Pack)

Protected under one or more of the following
patents: 4,748,962; 4,774,927; 5,020,507; 5,495,843;
5,678,529; 6,712,057; 6,964,271

X-Blades Broadheads

When Barnett's X-Blades make contact with their target, the patent pending mechanized broadhead's tip is pushed in, locking the blades into place, releasing upon impact into the target. This gives it maximum cutting diameter at the point of entry, as well as the exit hole. X-Blade's rear deploying blades will not deflect an angled shot. When you're ready, X-Blades can be reset by simply pulling the tip back out.

16068 X-Blades Broadheads 3 pack

Gamecrusher Broadheads

Gamecrusher Broad Heads will become one of the most trusted names in mechanical broadheads. Partnering with NAP this broadhead flies straight with pinpoint accuracy. Utilizing the ultra sharp Diamize™ blades, It will undoubtedly perform better than any other mechanical broadhead in the toughest conditions.

16120 Gamecrusher Broadheads 3 pack

Cross® Crossbow Quiver

Introducing the new Cross® three arrow quiver, featuring parallel or perpendicular mounting capabilities. Ships with hip attachment.

17069 Cross® Carbon Crossbow Quiver
17097 Cross® Camo Crossbow Quiver

Crossbow Arrows

Barnett 18" and Headhunter™ 20" and 22" arrows specifically made for superior performance with crossbows.

16107 Five Barnett 18" Arrows with Field Points
19100 Bulk Pack (48) 18" Arrows with Field Points
16075 Five 20" Headhunter™ Arrows with field points/moon nock
19002 Bulk Pack (48) 20" Headhunter™ Arrows with field points/moon nock
16109 Five 22" 515 grain Arrows with field points
16079 Five 22" Headhunter™ Arrows with field points/moon nock
19000 Bulk Pack (48) 22" Headhunter™ Arrows with field points/moon nock

...BUILT FOR THE HUNT.

Crossbow Case

This soft side case provides not only protection for your bow, but offers you easy access to your hunting or shooting accessories. Additional compartments provide room and protection for your quiver, accessory case and more. Details are not missed in this case for user comfort and convenience, the shoulder strap is padded and removable.

17083 Cross® Crossbow Case

Premium Crossbow Case

The best of both worlds when it comes to a crossbow case. The Cross Premium case is a perfect blend of both hard and soft which allows for maximum versatility, and everyday protection. Key parts of this case are designed with dense pliable foam just like what is found in Crocs™ Shoes. The cams are protected by molded corner protectors, the Scope is protected by a hard outer with a 'living' foam insert.

17401 Black Cross® Crossbow Case
17403 Realtree® APG™ Cross® Crossbow Case

Barnett Talon™ Crossbow Sling

Designed specifically for Barnett Crossbows, the Talon offers extreme grip, even in less than perfect conditions. Adjustable from 32" to 40", it has a quick release so that weapons are quickly and quietly released without tools needed.

17081 Talon Crossbow Sling

Cross® Crossbow Sling

Even in less than perfect conditions, this sling is designed to offer extreme grip. Made to fit any brand of crossbow, it is adjustable from 32" to 40" and has quick release clips for ease of use and storage.

17079 Cross® Crossbow Sling

Cross® Soft Grip

The New Cross Soft Grip adds that perfect feel and look to your Crossbow. Made from a very soft pliable rubber, it provides maximum comfort. It is easy to install and fits all Barnett crossbows made in the last three years.

17074 Cross® Soft Grip Gray
17075 Cross® Soft Grip Black

Rope Cocking Device

The original Rope Cocking Device simplifies cocking any crossbow by decreasing the cocking tension by half. Handles allow for a firm hold and the rope may be adjusted to fit both the bow and user. Simply a must for the avid user.

17014 Rope Cocking Device

Cross® Rope Cocking Device with Multi-tool

This innovative design is easily adjustable to any crossbow on the market featuring comfortable soft-touch handles. It also contains 4 allen keys (5/16, 3/16, 3 mil and 6 mil) for use on all Barnett models and most competitors models. Utilizing the Rope Cocking Device, increases accuracy, decreases the draw weight by 50%.
